Your trusted partner in clinical nutrition research
OUR RANGE OF SERVICES INCLUDES

ACUTE TESTING
- Glycemic Index
- Insulin Response
- Satiety
- Markers of Metabolism and Fermentation
- Continuous Blood Glucose Monitoring
- Stable isotopes

LONG TERM TRIALS
- Weight Loss
- Cardiovascular Disease Risk Factors
- Multi-Center Trials
- Natural Health Products
- Novel Fibers

SCIENTIFIC REVIEW
- Consulting
- Meta-Analyses
- Expert Witness

At GI Labs, we meet your needs by providing accurate, independent, and confidential results with competitive pricing, fast turnaround times, and client ownership of intellectual property.

GI Labs is an ISO 9001 certified clinical research organization providing the highest quality clinical nutrition research services to the food industry.

GI Labs conducts acute and long-term clinical trials in either healthy participants or specific target populations with various metabolic or health conditions, depending on research needs and objectives. Following recognized methodologies or custom-designed protocols, we ensure the study design meets your research objectives.

GI Labs is proud to have Dr. Thomas Wolever and Dr. Alexandra Jenkins as our Principal Scientists, who are each widely recognized for their expertise in nutrition research. These academic professionals, who have authored over 500 original research papers, lead a team of experienced scientists with wide-ranging areas of expertise, who leverage their knowledge and experience to determine how to best address your research objectives.

At GI Labs, we test metabolic responses to foods and ingredients to address strategic objectives for the food industry. Our research substantiates product claims to support regulatory requirements, provides strategic direction, and powerfully differentiates your product to defend against competitive pressures.
